PROFILE

Software Engineering graduate (BEng Hons, Second Class Upper) with 1+ year of professional experience building SaaS products in Laravel. Builds full-stack applications with React, Node.js, NestJS and TypeScript, and uses AI tools to build and ship faster. Looking for a full-stack software engineer role.

SKILLS

Languages

PHP, JavaScript, TypeScript, Python

Frameworks

Laravel, React, Next.js, Node.js, NestJS, FastAPI, Tailwind CSS

Databases

MySQL, PostgreSQL, Redis, Prisma

AI & LLMs

LLM API integration, semantic search, prompt design, AI-assisted development

Tools

Git, GitHub, Postman

Practices

REST APIs, JWT authentication, WebSockets, Stripe integration, Testing

PROFESSIONAL EXPERIENCE

Associate Software Engineer

10/2025 – Present

Softlenz 

- Debug and enhance a Laravel SaaS product.
- Build new features and improve the UI.
- Design posters and AI-generated videos for the SaaS products.

Associate Software Engineer

01/2026 – 05/2026

AI Generix 

- Built a SaaS distribution management system from scratch using Laravel.
- Built new features and improved the UI.
- Built the company website.

Software Engineering Intern

07/2025 – 10/2025

Alpha Health Group 

- Built and improved Laravel websites, making them faster and SEO-friendly.
- Tested websites and fixed issues before release.

PROJECTS

LankaKit [↗](#)

10/2026 – Present

React, TypeScript, Tailwind, Vitest

- Platform of Sri Lankan lookup tools such as a NIC decoder and phone checker.
- English, Sinhala and Tamil support, with 69 automated tests.

Multi-Tenant SaaS Starter [↗](#)

10/2026 – 10/2026

Laravel, React, MySQL, Stripe

- Teams with tenant data isolation, role-based access, policies and invitations.
- Stripe subscriptions with webhooks and invoices.

Multilingual Support Inbox [↗](#)

10/2026 – 10/2026

NestJS, React, PostgreSQL, Redis, BullMQ, Socket.io

- Support inbox that auto-detects language, translates messages and tags them by topic and urgency using LLMs, so agents reply in their own language.
- JWT auth, rate limiting, background job queues, live updates, AI call logging and integration tests.

Noor [↗](#)

07/2026 – 07/2026

Next.js, Prisma, PostgreSQL, Auth.js

- Built and deployed on a zero-cost stack.
- Full text with Arabic, English and Tamil translations, push reminders and an admin dashboard with analytics.

Travix: AI Travel Assistant for Sri Lanka [↗](#)

05/2026 – 08/2026

React, TypeScript, FastAPI, PostgreSQL, Hugging Face

- Chatbot combining semantic search (SentenceTransformers) with a generative fallback model (Flan-T5), with saved chat sessions and voice input.
- Admin dashboard to manage the knowledge base and tour packages, and to review unanswered questions. JWT auth with role-based access.
